the business will be intrastate, and the rate made must be approved by the State Corporation Commission.

they can tell to the inch by looking at heir land, where lime has been used. It is applied at the rate of three to four tons to the acre, and is renewed. Say, once in four years. By its use, stimulated by a nominal freight rate, the Governor hopes to make valuable and productive many thousands of acres in the eastern part of the State. The inducement to the railroads is to lie in the increased production, which will inevitably result in increased tonnage. The Governor hopes that the officials of the roads will get together and agree on a very low rate on this commodity.
